Environmental Assessment Services, LLC (EAS) is a nationally known, scientific environmental characterization company based in Eastern Washington since 2005. EAS is currently accepting applications for Senior Archaeologist to support cultural and historic resources work associated with the operations at various USACE and/or US Navy facilities throughout the country. This position is part-time with the potential to be full-time.

**Essential Functions:** Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Ensure that all cultural resources work conducted at military facilities follows all applicable cultural resource laws and regulations
- Managing cultural resource projects including preparing proposals, overseeing fieldwork, and completion of reports.
- Prepare National Historic Preservation Act (NHPA) compliance reports and supporting documentation necessary to protect or mitigate significant archaeological, historic, and Native American sites
- Conduct field work (e.g., survey, site testing, site evaluation, data recovery, construction site monitoring, and archaeological site condition monitoring) as required to meet project schedules
- Contact regulatory agency personnel such as various state Historic Preservation Offices (SHPOs), as needed, for cultural reviews
- Interact with area Tribes and other interested parties
- Interface with National Environmental Policy Act (NEPA) reviews and provide documentation to aid in NEPA determinations
- Serve as peer/technical reviewer for internal and external documents to ensure quality
- Conduct site condition monitoring or otherwise participate in CHRP Section 110 program
- Participate in site-wide Cultural Resources planning efforts (e.g. contractor interface meetings, Programmatic Agreements, review Master Plans, etc.)
- Assist with management of the archaeological collections

**Minimum Job Qualifications:**
• Must meet the Secretary of the Interior’s Professional Qualification Standards in Archaeology
• Must possess a Master’s degree or higher in Archaeology, Anthropology, or closely related field
• Must have at least 8 years’ experience in conducting and cultural resource investigations with increasing responsibilities including 2 of those years managing cultural resource projects

Desired Qualifications:

• Experience conducting cultural resources management studies at military facilities

Environmental Assessment Services, LLC is an Equal Opportunity Employer: Veterans/Disabled and other protected categories.
